SUMMARY

Frontend Developer with 2.8 years of experience building responsive and scalable web applications for USA-based clients. Skilled in Angular, NextJS, ReactJS, EXTJS, JavaScript, HTML, CSS, and Styling frameworks like TailwindCSS and Bootstrap. Known for a detail-oriented mindset, clear communication, and a proactive approach to problem-solving.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, C#, Go
- **Frontend Development:** Angular (v21), ReactJS, NextJS, EXTJS, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Libraries:** RxJS, Ramda
- **Database:** SQL
- **Dev Tools & Workflow:** Git, Husky (Git Hooks), GitHub Copilot, Bitbucket, SVN, JIRA, Confluence, Linux

WORK EXPERIENCE

Software Engineer 1 **January 2026 – Present**

MAQ Software

- Contributing to the migration of a legacy .NET / C# application to Angular within a monorepo-based Micro Frontend (MFE) architecture; supported the initial setup and structure of the monorepo MFE ecosystem.
- Actively developing features using Angular 21, leveraging modern capabilities such as standalone components, improved reactivity patterns, optimized routing, and performance-focused best practices.
- Authored POC design documentation and Architecture Decision Records (ADRs); implemented Git workflow automation using Husky and integrated AI-enabled code reviews in post-commit to enforce code quality standards.
- Migrated 3 UI controls and 2 pages to Angular while leveraging GitHub Copilot throughout the SDLC; utilized Ramda and Sheriff to maintain scalable architecture and enforce strict module boundaries.

Software Engineer – UI **June 2023- January 2026**

Vistaar Technologies

- Owned and drove the end-to-end frontend development for the team, leading UI architecture, and implementation; successfully delivered 15+ features, including 4 complete application screens, ensuring scalability, reusability, and consistent design standards.
- Designed and developed responsive, high-performance user interfaces using modern frontend technologies, with strong emphasis on component-driven architecture, cross-browser compatibility, and performance optimization for enterprise-scale applications.
- Implemented advanced capabilities such as Export to Excel, dynamic data grids, complex form workflows, and highly customized client-specific UI solutions, ensuring seamless integration with backend services and existing enterprise platforms.
- Partnered closely with enterprise clients, product owners, and internal stakeholders to gather requirements, convert business needs into technical specifications, and contribute to key UI/UX design decisions that enhanced usability and overall product experience.
- Proactively handled debugging, performance tuning, and production support; identified and resolved frontend bottlenecks, improved application responsiveness, and ensured stable, timely releases with minimal user impact.

CERTIFICATIONS

- Understanding TypeScript
- Angular - The Complete Guide
- The Ultimate React Course 2025: React, Next.js, Redux & More
- JavaScript: The Complete Guide (Beginner to Advanced, 2024)
- JavaScript: Advanced Concepts (2023 Update)
- Learn Linux in 5 Days and Level Up Your Career
- The Complete Oracle SQL Bootcamp 2024

PROJECTS

- **Redux Pizzeria:** Project Link
  Pizza ordering site with React, Redux Toolkit for state management, and protected routes for controlled navigation.
- **Web Code Editor (Code-pen clone):** Project Link
  A web-based HTML, CSS, JS code editor to solve your daily web development tasks.
- **Movie Nest (Movie List site):** Project Link
  Search, rate, and add your favourite movies with detailed description of each movie.

EDUCATION

- **Bachelor of Engineering**
  Saraswati college of Engineering, Kharghar 9.56 CGPA | 82.74%
